

SENSECO MC-6 Meeting

15 February 2023

University of Barcelona

Minutes of the meeting

11.00 Opening by Action Chair and presentation of agenda

- We are 17 people. We do not reach 2/3 for decision making and decisions are subject to approval by the MC via e-vote

Preparation of the final report

- Enrico: some issues with the website. There are some images that are not available. Apparently, this is solved.
- Mou objectives – supporting arguments of each objective has been reached.
- Send the documents to Egor to put them on the website.
- By the 31st of March things need to be done and uploaded in the SENSECO website.
 - o WG1 will send the scaling hackathon challenge draft or technical report (the proof)
 - o Objectives of WG2. Try to achieve 100% - Draft of the review paper and the other document in preparation. Extra deliverables will be better.
 - o WG3: Opinion paper and review paper are done. The draft version of the guidelines and the surveys can be uploaded on the website.
 - o WG4: Some of the deliverables are already on the website. Again, upload the draft or even the final version of the paper.
- Papers in preparations to be protected can be uploaded in “Preprints”.
- List of STSM, Virtual Mobility and ITC Grants: make an overview of the people – update it and put on the website (Enrico, Shawn, Dessi and Verónica).
- Training of less-experience researchers: training school material – already the link. Link Youtube channel with the Young SENSECO videos and add material for the young researchers (Katja and Verónica)
- “End users have so far not been the central focus of SENSECO activities” – We have a short conclusion for the meeting (Miriam), the survey to the companies, presentations from the companies (Shawn and Verónica). Some of these things are already on the website.
- Deliverables:
 - o Deliverable 1.2. WG1: Scaling hackathon and SIF spatial heterogeneity.
 - o Deliverable 2.2. WG2: Review paper and submit the dataset.
 - o Deliverable 3.1. WG3: Review paper and the other is a bonus.
 - o Deliverable 3.2. WG3: Protocol with the current draft for the guideline.
 - o Deliverable 4.2. WG4. Correct link. Add “g” to training (Martin)
 - o Deliverable 4.3. WG4. One of the two drafts on progress
- List of all the publications addressing SENSECO
- In the same google sheet (Katja will compile the information):
 - o Project activities – projects of everyone. Any funded projects can be listed.
 - o Patents
 - o Open license: Open-source software with the copyright
 - o Youtube: learning material channel/tutorials.

- Impact: add links to the summer school and materials (Martin)
- Communication platform: add slack statistics and make sure that the links to the social media pages are ok,
- List of Young SENSECO and webinars – share the link.
- Martin asked Enrico's input in the section impact – advancing the careers.
- Martin retrieves dissemination meeting from e-cost.
- Other dissemination activities:
 - o Website
 - o Video link
 - o Link of all social channels on the website (Egor)

- Expectation activities for a commercial use:
 - o Shawn's app – name of the item, target audience and outcome
 - o Offer's app
 - o GitHub repositories
 - o ARTMO, Time series toolboxes, SPECCHIO, and others

- Suggestions for improvements:
 - o Keep hybrid meetings that they came out from covid. They are useful and interesting tools. Strongly suggest that they maintain virtual mobility grants.
 - o Communicate changes and rules more clearly.

- Sustain the network:
 - o Sustain channels actives like slack, LinkedIn, github, twitter, research gate, youtube and drive.
 - o Project collaborations within SENSECO network
 - o Possible publications after the STSMs.
 - o Young SENSECO webinars will become SENSECO Webinar, conducted once a month for everyone to have the possibility to share their research.
 - o Applied for PANGEOS. Shawn has explained about it.

12.15 Closure of the meeting by Action Chair
